July 23, 1929

My dear Stelfax,

Thanks for your letter received in Cork yesterday.

I am glad to know that the determination of A. carbonaria is correct and I hope that the small Helictus will prove to be H. minutissimus.

I caught the A. carbonaria as it landed, apparently to enter a burrow on a bare sandy spot about halfway up the slope of the upper pit, so the species evidently nests in the place. I was there only (1.30 to 2.30 P.M.) about an hour, when a thick mist

Next address until Friday—Dooly's Hotel, Biey.
Came on and dispersed all bees.

The little Halictus was resting on the face of a cutting in the sand.

If you visit the place please examine a couple of old pits overgrown with brambles. There are some very large burrows in them but it was too cloudy when I was there for the moths to come out.

I got here last night but this has been a very wet day here and I am leaving tomorrow morning.

There is a large colony of bees on the wall of the Westford bridge, on the sand-pit end, as on Scarrow Bridge!

The specimen of Megachile centuncularia was taken flying along the stones of the mud-capped fence by the roadside at Enniscorthy, the earth on top of the fence is almost "honey-combed" by a great colony of bees.

The enclosed few moths were all taken after 8 P.M. on the evening mentioned!

Glad to hear that you had a good day in the Deputys Pass.

With kind regards to all,

Yours sincerely,

R.F. Phillips

Scenconus cf. cfionium 9

Colynathus diminutus 299

Shaken out of rock of Ammaphila in sandstone.
List of Limostes & Banchida, sent to R. Roman, Feb. 1930.

   This is the thickest specimen I have taken!

3. L. irigera or nitida sp. Calcio, UX. 15. 7. 1929.
   To judge from descriptions, both ought to be the same species, but
   I have nothing of this short-tailed species.

4. L. sp. sp. Another kind of L. bellator, but unlike
   any other specimen I have seen. Kieary, UX. 25. 7. 1929.
   Might be a var. of carbonaria Henry, but I am not quite sure the abdomen normal.

   I think they are L. palpalis (though having never before
   seen the species, I may be mistaken). Palpalis sp. undescribed.

7. L. sp. sp. (cf. L. viricola). Glen, UX. 17. 7. 1929.

8. L. sp. sp. (cf. L. humerella). Radderym, UX. 8. 7. 1926.
   These are the same species, L. buccator Thumb. The 1st abd. segment is some,
   what different in both, but this is accidental. I have seen it before in L. buccator.

9. L. sp. sp. Upper Liffey, UX. 1. 2. 1927.
   L. buccator, too.

10. L. sp. sp. Glen of Imaal, UX. 31. 7. 1927.
    A melanistic & of L. errabunda Henry (compared with type).

11 is erabunda like 10. No. 12 may be erabunda, but if so it is very much smaller than the ♂♂ types.

= No. 12 ♂, but has yellow points on vertex, hind trochanters red.

Not dubia, who has a teretria longer than the body (not rare on spruce here). Very near a ♂ ♀ I have from S. Sweden, from Germany, living on oak.

+5. L. ♀. ? ♂ (cf. L. tronca) Lucan, 61. 5. 8. 1923.

This ♀ has very strongly punctured abdomen (seg. 2 & 3!)

104. L. buccator Thunb. ♀. [No. 103 ♀ mostly named variocera by L. A. T.]

Abdomen can strongly punctured, but of the same kind of sculpture.

105. L. buccator, w. rudimental vertical dots. [104 ♀ mostly named hamosera by L. A. T. Johnson.

= No. 16. It is remarkable none of the present specimens have the

two red facial stripes not rare in Sweden & used as a character for var. •

bought from Pomecourt, 61. 21. 8. 1927.

L. culiciformis ♂, dark var.

Correct.
E. punctiventris Thun. Have no material for comparison at hand.

Unknown to me. Antenna broken, due to the short needle.

22. L. p. ? S. Taken with No. 21. Looks like a small L. errabunda?
Sculpture of abd. much smoother than in errabunda. May belong to No. 21.

Meeting of the Waters, 11, 23.7.1927.

24. Euxesta p. ? S. (? sp. of E. guttatorius with black scutellum)
Hildarin, CW, 9.8.1929.

25. E. illusor sp. van peditius nigri. Ant. thinner than in adpressoria.

B. creptidens Ubr. S. The northernmost locality known (A. Kyrip.

27. B. volatatorius S. Lahore, UX, 21.7.1929.
Correct, S.

B. femoralis Thun S.?

Newton Abbot,
Devon.
2 x 30

Dear Stelfox,

I sent you a P.C. to-night before post-time to correct an item in the list of Lep. I had sent previously.

Your V3 flat larva on Alnus is not Lepiurus spectabilis Linnei, but Alnus larva are V3 different. Those I have seen have only the 3 pairs of true legs — no prolegs at all. Seps — e live entirely in tubes or cases made of leaves or close webbing in webs — queer beast, almost repulsive. Your other less flat larvas are one or two species of Nematinae. I have bred the two common ones often from one Alder, and also the one on Birch, the larvae of which being black or sort of dark — E. E. Smith describes it, puzzled me for a second or two before I got the image. [Isn't it 30? of this couple? I think this year.] The near all green, e. n. not sand. Larva of elm often from 9 Septentrionalis variegus as you suggest. I men. If you can breed the black Alder larvae, please send me a or two.

I miss the 6 D from those you sent me a year or two ago.

There are also a number of common Tentula dimini larvae on Alder — things like Phlogogaster varioli but I have never tried to breed them.

Your pink-stripped flat larva on Salix is pretty sure to the Phleumidea Curtisiai, a white wasp, me in Alder may be.
Empiric pubescenta, unless it is a very young Auricle or Thrichidone or some one of which I believe are two species in casual state.

We have really had almost unseasonable weather this September, & August except for that infernal spell of few days, was as bad. When the last bad spell of weather began in September, i.e. when we shall have some sun & warmth in our 2nd ward of Paris, 'Vaucouleurs' were fresh & hard & stuck about the house: since then apparently every one has been killed so there is not an egg or larva to be found in the cabbages in the garden next doors, whereas himself there are any quantity. I shall think it will be as rare as a Cambwells beauty next Spring!

I am even beginning to doubt whether I shall get to the Haliciste Augusteps locality—shuns each way—to dig out & this year. I may trust to the chance of finding these next April or catching them abroad.

Yours truly,
R.C. L. Perkins.

3rd August 1929. A hot sticky day, with my story SW wind, after a strong S W right. Sun.
my left. Brand, but only a little.
11.30 till 1pm. Walked with Hugh to 2nd pt. More
signatures & checked 62 miles in straight line
between 2 - 5 1/2 points, in broken & swampy
country.

Other Estimates:

Samantha, Marginalia?

Brand, navigation.

4pm till 6pm. Walked with Hugh from Everywhere
to Benin Head 4 books. Bay other, but book things
themselves. No one.

Saw many shells, v. difficult on Benin Head.

Saw also Tuckahoe pictures & Conical planter.

Conical approx. 9 on stage on point like 5.9

Benin Head. Very good prom. covered with light.

Fincham, Saimach, 8-9.

Tuckahoe, 2 on stage also.

4th August 1929. A hot, not right a moving, some
rain in afternoon, hot heavy rain. Got little wind.
12 noon train to Conical Island & stage 50 sq. pm. Wh.

Left 1 in cat damn cloth. Work on stage & 50 sq
ally

Below island, Conical Island.

Strawberry 100 pounds. San Francisco (8.15) in English

in moving right in climate. Very black, good for
Conical Island weight.

Brown 15 lbs. 3. Aggs, 8.15 am. ray gun.

Cattle ranges 29th. C. Aggs. 1 am. ray gun.

Fylinga, Aggs. 9 in England.

Aggs, 10. Fylinga. 9.4 English.

5th August 1929 (South Ireland). A dull cold day after a very bright morning. Leaving Kenmare at
approach to new复仇 in afternoon.
Drone to Scaravillic Bridge (N. of Kennistown)
then, via Talbots, to Killarney Bridge (Kenmare). Road collected from an hour in
just past Drum with some old coke storage.
Afterwards drove through Kenmare along S. end
of Kenmare forest path. Ballylakeland, N. to Woodbrooke Botanist, & Newton Barry, then home via Larne &
Foyle. Some quite promising ground near
corner of town, and Woodbrooke & from
Blaenau Bridge to Forest Gross Road.

At Killarney Bridge brow in collected
Bombyx lucens, hartman sp. agrum
Antheraea utaria 99.

29th Sept. 1929. A fine day, but not quite, wettest not a bit and kept on rowing to try to keep warm. Blister, cockle on sandflat. 1 mile below Bridge, 2 ins. Bomb 15. 27F 28° 30. BM. 9°. 7°.

Halik and Blumberland 13 rh. 3 miles on Saline. Vernon says 107 77° (a. 74°) new. Anem. sandhills 0.

Peonies 7. Sal. 15° 30' 31. 5°.

Fennel. 7°. Night in wood.

6th Oct. 1929. Cold day, not very cold. 1 hour after my peak depression. Don Brooker, to Brooma. Displaced point. 1 walked up old road for half day. 1 came, sitting, 1929. 1st Oct. 1929. 2nd Oct. 1929. 1 collected cranno. 20 M. 2nd Oct. 1929. 1 collected cranno.

13th October 1929. A very mild day, with the wind.

The usual run at 7.30 a.m., after the usual till 2 p.m.

Then out till 3.30.

Valley of Lumberland. Also at Bousley's 7th, Lasenby, and W. 12-30 till 4 p.m.

Saw most of the birds. 20007 (just after my first). There caught a black G. with 2 black spots. 6 May G. worms.

Protobius a deep blue at a meadow. G. land and walked up right back & took one small ick. (2 gills)

By my watch, banded three. 2 tickets, also J. 17th (banded 23)

With local observer, afternoon, crossed to 9th back by 2 p.m. Only 1 of the trio, collared at 2.30, seen along town fields immediately NE by west.

The 2 July beak, were very near to my von. Bombus agrorum, vom. Vespa vulgaris).

25th Oct. 1929. A fine afternoon. Drove to Athens, S., with M. B. to get some. Juttes what was planted on. Found it grown. A bit of blue sky by M. B. although not seen the sun. They were some near Athens (M. Flood). Most no lynstrumpom.

3rd Nov. 1929. A blizzard day, all snow, but some cold, strong wind. A.S.U. Train to Kendal. Walked to the Red Hill, then north up. Dunning Hill to Blam of Klin. Then on George Hill. Back to Klin near edge of Thurs. took them on. (Feeth, contines on flood. at Dunning Hill.)

6th Nov. 1929. A fine day, with cold. W. took M. K. and M. B. to march down for Klin. Walked some M. W. I. to explore the part of my own. I. B. first July 1700. There was a blue. on Dunning. Not much found to the characters. 10th Nov. When a fine morning.

From the deep depression, followed some gale. Explored upper part of Deepark, Row NT, especially with valley towards the lake. There on S.W. side of some large hanging valley with nearly flat. Which site good place for me. This is lynstrumpom height, more from E. side of waterfall.
17th Nov. 1929. Walked from Old Barn up Glencreele by Bosy Brook, round Suncum, back via Butler Mt. Ballinapan Hill & Shen Callowway. Day fairly clear, 1500ft. Friday
24th Nov. 1929. Walked Old Cunnaga & Old Mt. Alle, stopping at Knockgan Inn, Glenleve & Is held at that spot. 24.00 took small boat up to Dromore via Magorley, Ballinglane & Hollycross Glen. Friday
1st Dec. 1929. Walked from lambrick into conifer wood fell up west side valley to Galtly, then to N. end of R. down hill & also E. channel of Upper Leevy to Th. power & C. Ross.

"San 1. 1928. No. 79 may be Carborundum, but if so it is very similar, smaller than the 79 type. A. R.

"San 1. 1928. No. 79 may be Carborundum, but if so it is very similar, smaller than the 79 type. A. R.

No. 102. L. sp.? 7. (P. Parvinia). Bell County, WI, 25. 8. 1926.

"Not the same. No. 7 is a little longer than the Pink body (79 one from same here). Very near a 7. 79 than from S. Indiana from 7. Parvinia." A. R.

"The 7 has very strong, pointed abdomen (my 253)

2. L. Parvinia. Lucas, WI. A. R.

"Abdomen too strong, pointed, but not the same kind, perhaps?

2. L. Parvinia, with somewhat rounded 79 type. A. R.

No. 105. L. sp.? 7. (P. No. 104). Darien, WI, 29. 7. 1929.

San 1. No. 104. A. R. Remember that one of the present species has the third pair of legs similar. Not sure in Lucas 1 and 2 characters for various. A. R.

No. 106. L. sp. 7. Short tubes. 7 has two pair from past, brought from same. Not sure from Peoria Co, WI, 21. 8. 1929.

"L. Parvinia." A. R.
No. 107. L. equiseti. F. Colma, 11. 29.1.1929.  
"Correct." A. R.

"L. sp. partialis. The form not retained for synonymy.
"l-hand." A. R.

"Unsure of the entrance taken, due to the small size."

No. 110. L. sp.? Taken with No. 109. Looks like a small  
L. equiseti. A. C.  
"Suggestive of abdomen....or rather than in entomaria. May be L. 109."  
A. R.

No. 111. L. f. A. R. with slight modifications.  
A. R.

No. 112. Entomaria sp. & ?  
"L. sp. partialis and Entomaria sp. A. R.

No. 113. Entomaria sp. F. M. Butler, NT. 17. 8. 1927. A. R.  
"Correct."  
"B. equisetius. F. A. R.

"B. equiseti. A. R.

"Correct." A. R.

"3. B. P. F. A. R.

No. 117. B. sp.?  
"B. sp. partialis. F. A. R.

Ex. Roman postcard dated 3.3.1929 reads:  
"The grey species attaches itself to the myrmicine termite Ant. sp. and B. equiseti and B. multistriata, specially at Banaba.  
It is described from the lower River valley (19), the type of A. stratonyx.  
Thornbill and B. stratonyx, especially at Banaba."

We think of the grey species of Ant will attach itself to B. multistriata. F. A. R.  
It seems to be an exclusive grey species, always with B. multistriata.  
It can be in the entomaria a parasitic of B. multistriata. F. A. R.

105.
26th Jan 1930. ASU. A cold day, but sunny, went in hills.

28th Jan 1930. Walked to Tintagel, via Stein, Tintagel Moor, &c.

9th Feb 1930. A perfect day! Train to Portmeirion. Walked along coast from Berry Head to Conn. Submerged foot in first wave at N. end of Portmeirion. Started from St. Govan, walked along coast near Berry Head to Berry, St. Govan, St. Govan's Church, Portmeirion, &c., in evening.

23rd Feb 1930. A perfect day! Spent day in afternoon.

24th Feb 1930. Walking in St. David's, walked to Pembrokeshire, in evening.

25th Feb 1930. A perfect day, will cold wind. Train to Ballymany, Cork.

7th March 1930. Left. Stayed a few minutes in evening with Mr. Gifford at Belfast house.

9th March 1930. Very wet, mist rain all day. ASU. Train to Holywood Glen. Walked up Torquay Road and saw some rock. Walked to the top of Torquay Park and back on Exeter Rd.

16th March 1930. A fine sunny day. Walked to Trepottage and home.

17th March 1930. A perfect day. Toasted Barmy (Barmy) at the Market, Q.U.

18th March 1930. A perfect day. Went for a walk to the beach.

23rd March 1930. A fine, very warm, clear day. Great Northern Railway. Walked at Reckitt's. Saw nothing very interesting.

25th March 1930. Rain all day. Went to St. Eval Church, walked to the sea. Nothing seen.

6th April 1930. No wind for a long time! Went for a walk and a beautiful morning. Went to the Northicle near 11 a.m. and spent the afternoon at the beach. Saw nothing of interest.

7th April 1930. Afternoon. A fine sunny day with cold wind (N).

Went out to Dingle Glen at Glenamuck. Cold.

Bomhe & Company was a few ft. near.

Very foggy, looked like cylinder but?

I stand on bay & look out to sea & seems to all just a cloud of foggy light & a mist? Look at my grandmother now in me & it...

Cyanide 1 ft. & 1 inch.

N.W. wind over 10 ft. Andrew at miller.

What code will I say like Christy, but?

1st April 1930. Afternoon. A fine day, not very cold, much sun, but cold N. wind is valley.

Wrote train 25 / Glenskeen. Enid along here

Wrote E. & Co. B.

Walter Sulli, clock very abundant. Send Martin to the Doctor above 1st floor. Bomhe & Company 1/2 timber & B. jenelle. Front Andrew along 1/2 in ft 1 & 1 ft.

Programme O.5 + 1 ft. 9 in.

Hobson is present 6 ft. above front.

Andrew at miller 2 ft. 9 in. 1 small & ft. 2 ft. 9 in. at miller.

1st 3 ft. 2 inches & 1 inch of miller ft.

ARKLOW (EASTER) TRIP: 1930.

17th April 1930. 8:30 a.m. Arklow 1st afternoon.

A fine day with almost a solar 1 ft. after

my head. Mary. Everything very beautiful.

Sailed at 9.00 to morning voyage. 11 ft. but little rain.

A big 1 ft. Andrew along 1 & 1 Bomhe.

2nd April 1930. A fine day will need an

hourly but some cold. N. wind.

Sailed by wind helly bay to L. curnick.

1st hour by east. Morning!

Bomhe & Company numerous 1 ft. miller.

D.H. Booth 1 ft. & 1 inch along 1 ft.

Cyanide very neat & 9 ft. along

D.H. Booth 1 ft. & 1 inch along 1 ft.

N.W. wind over 10 ft. above 1st floor.

Andrew & Enid along & 2 ft. & 1 ft.

H. & Co. B. & 1 ft. Andrew along 1 ft.

H. (Enid) 1 ft. & 2 inches along & 1 ft. & 2 inches along 1 ft.

From post-carnival (pp. 169 & 170). Sold 1 fish. Upright. All fish in the market. Many fishermen on the beach loading fish on the quay. 

My first fish in one month.

Good stick of fish, either red or black. Also

Baked tomato 19. B. lemon 99. navy

In street. Went to both fish and black and
cake & my little fish. Saw. Baked jacket.

& B. lemon.know. No sign of either. off.

Stitchen & Wood slow till out of letter

pencil.

19th April 1930. Found fish till 4 P.M., but

Norfolk sale all day & very cold except

1 fish. Sold, with sheds open, only

5 victors.

Went B. & H. Bridge, 51, as usual.

Andrews Cappuccino with abundant served my

and jacket. Tho' Vincent very late he closed.

No Babba's men in sand flat.

4.00 of cars below + 10.00 displayed in work, all

forms of Vincent, also to Holley's Cornells.

Sand. (black) of in work. also went =

Shad. sale, amanories, &taken by track one

eggs, end of sand flat.

Gosling fish sand gone. 1st wine.

Holly abed. 19. so work.

Sellers run several times by 1935 boy.

4 till 5pm. Work to B. & H. Horand at

Meeting 4th. Shot, Anna. W. L.

Baked lemon 19. seen.

Andrews Cappuccino served 0.5.

No others. run through 1st sea & H1.

R.
22nd April 1930. A fine day. Cen. not considerable rain, dry, slight wind, partly cloudy.

Put on new brown chinny, used to-day. New hat, similar to last. Very good wood for making a few club sticks later in year.

Bombus hortorum. B. aporum. Very fine rain at pillar.

Sandhills, 59, colour Pt., G. W X.

1.30-4.30 p.m.

Bombus hortorum. B. torminalis (1). B. pellucida (2).
B. aporum 1 at Gl дорин. B. hortorum 1 at Pillar. Three seen.

Andrena albicornis 2 at pillar.

Will multing 2 at pillar.

Snuff 2 in sand. In big hollow, B. pellucida. 2,5 x 20.
22/4/30. Left home & took 5.30 pm. 
Sunset at 1.30. Beautiful Bridge, C.S.W. 
Misty rain in very dull, took a very flat.

23rd April 1930. Bull all day with very rain from 
11Am onwards.
Left hotel on St. Keverne Head & arrived at 
Tranwater & took 

24th April 1930. Camp, set & 3.30 pm, wet 
your all day.

25th April 1930. Still damp & foggy, it drifted 
from 3 pm onwards.

26th April 1930. A glorious day, with very SF. 
Ran from 11 to 4 pm. Very very wet, not at all, just coming 
out. Back to hotel at 7pm.

26th April 1930. Still damp & foggy, it drifted 
from 3 pm onwards.
Andrew albinae, 62 x run at willow below yew.
A cry was heard, all quiet.
Horsefly flying over yew, "To the far away."
Rasp w. ft. o. & g. at main place betwee.
Lost yew. in plan. north or south bush.

People inspected. 2½ mil. stra. for yew.
Gold leaf cut. all way of plan. also Orchids.
[Water cut at Newton near the brickyard.]

ARLLOW TRIP July 1930.

10th & 11th 1930. Left Dublin with George at 2 p.m. arrived Cork at 5 p.m. After 12 days in Cork got a cold (stomach trouble) and spent the time in bed. Stopped at Ballyheery House 3rd. 3:4 p.m.

11th got up and walked up to the town followed by one the local girls. No sign of a health plan.

No other activity even as no signs of "life" at "Cork!"

10th July 30. left "Cork" by N.Y. Railway at 3:45 p.m.

12th July 1930. A train coming looked like a "dampy" kind of day. Passed through New Ross at 6 a.m. --- Mrs. Gordon & family & walked along down to the Head of the River, G. W. 11 a.m. - 1 p.m. Brought back to Hotel & a good meal in the hotel restaurant. Also saw a fair in town.

Collects "mints" from the river man. Hauled out a yard & 2 bars of iron. Wore them as "jewelry".

13th July 1930. *W* in river, with an afternoon boat ride & fishing. Planted 49 potatoes in the river. Also saw a fair in town.

14th July 1930. A dampy kind of day. Collected "mints" from the river man. Hauled out a yard & 2 bars of iron. Wore them as "jewelry". Saw a fair in town.

15th July 1930. A dastardly day with snow. Deep snow, found it dark at night. Stayed at "Cork" all day until George playing cards & supper evening.
13th July 1930 (Sunday). SE wind, a depression approaching, mostly drifting. Rain by 10 a.m. then 3 p.m. Very heavy rain a pale from 7 p.m. all night.

Open to dinner, 6.30; left about 8.30, on N. side of valley via W. G. Saltgarth. Pale.

Some wind in north.

Beata, grrrr, Laurina, Capricornus ID 77.

Anemone punctata, ID 99.12 in hedges.

Malus domestica?

Trollius balticus 10.9. Althea, crataeva 4

3rd August 1930. A cold morning, cat and only one
in town. Mummy had the baby in her. Glendevon &
cat went in STER.

Dine J.F. at Glendevon & walked to upper end
of loch & back to Pottol. Dined at 3 pm.
Drove from Pottol to Glendevon & George
House. Must be looked at next year.

1-30 till 4-00 p.m. Valley below fell Glendevon. Cat
in front. Flood fell Glendevon. Only one end
of marsh & my little cat. Collected some
stones at marshes on small head of fall which
contains (?) by near some swamps. Some of them
hatched some still in eggs.

Bombyx mori, marron, lepidopteran 99 mm.
Lepidopteran 299 mm. in swamps.

Teridactyl lepidopteran 99 mm.

Bombyx mori 99 mm. Lepidopteran 299 mm in

Dwight, Repository 18-9, 5:00 (10,000) at 12:00 (10,000) en route to field into 15 miles.

of C.A. Bond (10,000, 10,000, 10,000, 10,000, 10,000, 10,000, 10,000, 10,000, 10,000, 10,000).

P. walker will not go.

Earth in guttation serum a carrot.

Drake, statistician; at Treadwell, comparison 18.

[Entry for 15. 8. 30.

[Letter in the margin:]

15. 8. 30, Kevan, C. N. cont.

[Letter in the margin:]

A small crowd seen at South. Never very large, but more seen to roll in south or to expect to see more seen at 7p. if field across road. Therefore I think there must be some other entity for magnetism. If this could be treated the results might be found in plenty at the locations in so abundant. Also in all the locations the results are so found, it seems likely that you could be seen a few days later.

A small crowd seen at 8:40 p.m. in B.C. Bond.

Bower, complete field. More.

Bower, more, and Bower, 4 or billions. And more, aquatic, abundant on South. Ball.

Mark or 2 or more large numbers every pole from Bin Drury, just practically disappeared almost.

C. Bower, 3 or South. More, the north.

C. aquatic, 9 or Kevan, 9 at the field.

C. minute, 3 or part, some gone there and only

McDaid, an error.

Path, large, 9 or small, 9 or field.

Aquatic, 9 or, 499 at 99 field.

South, 9 at and 9 part next Sherry.
16-8-30. Returning to C.W.S. camp.
No other accidents. 11.45 p.m. left camp. Horse left for firewood.

17th August 1930. Slight rain all day. did nothing!
18th August 1930. Left Arklow at 2 a.m. arrived home 11.45 a.m. Went ashore, and at
Arklow for tea. Packed and left for 

19th August 1930. Fine day. Left home. Arrived 

20th August 1930. Left Arklow at 2 a.m.

*Trifolium campestre* 9 ov. in field.

Tight *Nepeta* 1 ov. in field.

Tight *Melica annua* 1 ov.

15th Sept. 1930. A fine day, hot weather, still in
afternoon, rain to S.E. and misty clouds on till
*Pannonica densa* 20 ov. Almost all species
taken in one spot, this in 87 y. right back 90 y. in
about 200 yards below the descent's gate (the same
place as collected in on 12/9/39).
17th Sept. 1930. A dull day, cold, with S.E. wind, horses shivering, 2 to 3 ft. snow, some drifts.

Sandpit at Frip, 0.94 mm.; at Spanish, 0.96 mm.; at Knoll, 0.97 mm.

Bromley, 0.97 mm.; at 11.2 mm. at 1.1

H. nicholson 0.97 mm. at 1.0
H. eustace 0.91 mm. at 1.0
H. tenua 0.98 mm. at 1.2

At 1.2 the wind was howling.
21st Sept. 1930. 10.30 till 12.30 am. A fine very
unfavourable weather. Went out to errands.
Weather pleasant. 11 a.m. Left home. Arrived
at point about 10:30. Very pleasant weather.

Went to see Mr. and Mrs. Smith. They
were in the garden with some work. Talked
about the weather and the plants.

Dr. Smith: "It's been very pleasant here.

24th Sept. 1930. Left 2.30 - 4.30 pm. A few
clouds. Saw Mr. and Mrs. Johnson. They
were busy with some work. Said they
enjoyed the weather.

Mrs. Johnson: "The weather has been
very nice."

Plant list:

- Pimpinella vulgaris
- Calceolaria
- Cardamine
- Viola
- Primula
- Violacea
- Oenothera biennis
25th Sept. 1930. A fine day after a week of dull, cold weather, and N. W. cold. Considerable rain.
11.30 till 2.30 pm. Ballykeggy quarry, 6.40. Boom now grow a few of 12 x 32.
13. Lepidium 15 reported by George Hill. Harlequin 10 per cent.
Visita rupiae 4 per cent.
Wntred 0.25 into a Harlequin taken including Delphinium lanatum or elder.

28.9.30 and 3 till 5 pm.
Ballykeggy, 6.40.
A few more of elder & Damasonia taken and kept in field at top of the lane.

2 till 6.00 pm. Sand Beach, Upper Glenealy, C. 3.4. Very foggy.
Spent the afternoon looking for Sand Beach's more interesting bird list for ours, later. Went till 7.00 pm. Took a string and walked to the Ross (Pond) of Stroma and continued from green willow with small black spot and yellowish head to rail. Many small and far larger boats. Many are these and many.

Plenty of brown and white butterflies. Captured 10 figures.
10 cm. 17 cm. 19 cm. 23 cm. 25 cm. 27 cm. 29 cm. 31 cm.

Some of these are new. — October 1930.
The results of the egg-laying test (culled from the 10th October last to the 18th September, when the period of four weeks ended, have just been issued by the Northern Ireland Ministry of Agriculture. The figures given below are subject to alteration when the records are finally checked. All comments regarding the amount of prizes and certifications will be made in due course.

The test will commence on 23rd October, 1930. The following tables give the names of owners of pens, and the number of eggs laid by each pen.

ULSTER EGG-LAYING TEST

Period 16th October, 1929, to 16th September, 1930.

THE FINAL FIGURES.

The results of the egg-laying test (pullets) from the 16th October last to the 16th September, when the final period of four weeks ended, have just been issued by the Northern Ireland Ministry of Agriculture. The figures given below, the report states, are subject to alteration when the records are finally checked. An announcement regarding the awards of prizes and certificates will be made in due course. The next Test will commence on 15th October, 1930.

The following table gives the names of owners of pens, and the number of eggs laid by each pen:

Section 1—White Wyandottes (31 pens)—Mrs. Porter-Porter, Belle Isie, Lisbellaw, 1,296 eggs, value £10 13s. 2d.; Mrs. Andrews, Ballymacommell, Ballinderry, 1,301; Mrs. T. B. Brown, Donaclonley, Lurgan, 1,230; Miss Finlay, Glencairn, Clandeboye, 1,279; Mr. D. M'Intyre, Gas Works House, Dungannon, 1,347; Mrs. Darley, Trory, Ballinamallard, 1,163; Mrs. Pringle, Moor Farm, Ballygawley, 1,267; Mrs. Loughrin, Mackney, Cookstown, 1,292; Mrs. Warner, Rathtega, Bangor, 1,188; Miss R. W. M'Cormick, Brookend House, Stewartstown, 1,194; Mr. Lindsay, Hollygrove, Ballyvinney, Newtowendas, 1,191; Mr. McCann, Drumkeeragh, Ballynahinch, 1,196; *Mr. J. Heron, Ardigh House, Killyleagh, 1,342; *Mr. M'Master, Charlotte Street, Ballymoney, 1,283; Miss S. J. Moore, Ballymacan, Macasquin, Coleraine, 1,353; Lady Dunleath, Ballywalter, 1,157; *Mrs. K. Baird, Kilbride, Greyabbey, 1,133; Mrs. J. Boyd, Northfield, Donaghadee, 1,041; Mr. A. H. Jackson, Portmuck, Islandmagee, 1,169; Miss M. Shields, Altmore, Pomeroy, 1,103; Mr. J. M'Ilroy, Drumnacoo, Castlewellan, 962; Mrs. J. Jamison, Newcastle Road, Castlewellan, 1,128; Mr. W. K. Stewart, Skilganabab, Ballyclare, 1,078; Mr. W. Hall, Drumnacairn Poultry Farm, Lurgan, 1,017; Mr. H. Shaw, Mullaghmore Cottage, Greenisland, 965; Mr. W. Denvir, Castlebouy, Portaderry, 1,018; Mrs. M. A. Barnett, Ballagh, Clogher, 852; S. M'Guire, Cappy House, Bannbridge, 851; J. McNeill, Drain's Bay, Larne, 826; Capt. C. Lockhart House, Killyleagh, 846; Mr. W. T. Bellingham, Ballymena, 492.

THE CADET CORPS

Will Live Despite "Government’s Effort to Kill Them."

The "Morning Post" says—The Cadet Corps, although the Government has attempted to kill them, are not to be allowed to die. A new organisation has been formed, as our military correspondent reports, to continue the good work. Lord Allenby, never slack in the public service, is to be the head of a strong Federal Council. The organisation is on a territorial basis, each cadet battalion being under the charge of its county committee, over which the Lord Lieutenant of the county concerned will preside. Thus a movement which encourages patriotism and service in our youth will be maintained in spite of official neglect and political hostility. The pacifist and the little Englander still persist in the fallacy that disarmament secures peace, and that by turning the British Lion into a British sheep all danger of war may be avoided. They were preaching exactly the same thing—on Thursday eve.
5th Oct. 1930. A fine morning. [In] red ink.

Breton [in] rosso. Came near September 31st.

Thursday, 1930.

8th December 1930. A dull day, mild & calm (foggy in Dublin) after a couple of dull blustery days.

Worked in from 8 a.m. to 9 a.m. at Port of Glenmore (Columbiana), G. 6.

Beeswax available in my blender. polyethylene. 2 p.m. done.

10.30 a.m. back to linn. Polythene 62.

Staunton's door 6. 13. 8. 1930. Polyethylene. 1 p.m. to linn. Polythene 62.

Thursday, 1930.
14th December 1930. A very cold day, with heavy showers about 11.30 AM., after a week of really stormy weather.

Drove via Persia Park to Lucan & home, 4.30.

Stopped at the 'Four Gills' in the park. Rose many good oaks still in flower in old trees. But only one almost yield dripping: namely, a steam navigated 2.9 ft., and I had 2 ; many steam navigated 1/2 all 99. Too early, windy & cold.

Then drove on beyond Harcum house & instead of the usual route of 'Hillbank' wood (Woodland), rose in another street from my - kind of old garage. I had many many dozens of not very handsome 1; streaming on the way: and only 1 Steamman, without filter, above were 4 were taken from the main, but 2 place might pay in future.

1st Jan. 1931. A fine frosty day. Left the house 7.30 am. George had made no fire. I shone up to Bridge in Pleasant Rd. at 8.45. I walked round after morn., as very low, stopped at train and then took the elevated, left the house 1st fl. 29th December.

2nd Jan. 1931. Another perfect winter day. From High to New Castle. Walked 50s. in a mile 1/4. Felt the need of fresh air, but only 37 in. 6 ft.

3rd Jan. 1931. Another perfect winter day. Left from High to Killiney. Encountered hill from sea side. On way up through Victoria Park of at a few bits of very flower. 829 December.

4th Jan. 1931. A chill finer day. From High to M.D.C. to Wicklow Head, G. W. Called on head to lighting, afterwards called at "Bathra" and then home. After return walked along coast towards (Prince 2 4th.)

8th Jan. 1931. The eighth twenty day. 1st just passing. Not dessert. After breakfast from 9.00 to 10.00. A very cold wind from 11.40. Worked my way there behind Dr. Chambers. G. W. Had only 37 in. because.

22nd February 1931. A lovely day, had strong S. wind. Drove to Ballyegrogy gym. 11.00 Am. From High 40° hours. 10.50 sun & shelter. Two blackbirds & cattle. beacon out of (see chart). But in the approximate sun. Then down on to main, 640 and walked to foot of Demid. 1 st.

15th March 1931. The second of two beautiful sunny days. After very little wind & wind, went to Ballyegrogy gym 81. Fart a hair then 11.10-12.0 am. 6 blackbirds out of day, but not into two. On my return 197 at the beacon. At 12.30 called at Wicklow at bottom of gym. At 12.45 came on and Andy was on a dockside, but nothing else.
22 4th March 1931. A bright sunny day and cold
